

Hadfield Services Ltd

Climate Strategy 2024

Introduction

At Hadfield Services Ltd (HSL), we are committed to a sustainable future by integrating environmental responsibility into our core business practices. This Climate Strategy outlines our vision, actions, and goals for reducing our environmental footprint while driving innovation and operational excellence.

Current Initiatives

1. Recycling Programs

- All waste wire is recycled and repurposed.
- Cardboard packaging is systematically recycled to minimise landfill waste.

2. Energy Efficiency

- CAP Rig: Our in-house innovation has reduced programming time from 30 minutes per unit to 4 units in just 6.5 minutes. This advancement has gained global recognition and adoption by our customers.
- Precision Heat Tools: We utilise tools that use only the exact power needed, adhering to manufacturer specifications and reducing energy waste.

3. Responsible Sourcing

- HSL sources materials from trusted suppliers like RS, Digi-Key, and Mouser, ensuring quality

and

responsible practices.

Future Goals

1. Achieve ISO 14001 Certification

- Implement a robust Environmental Management System by early 2025 to ensure continuous improvement in sustainability and regulatory compliance.

2. Reduce Carbon Footprint

- Integrate energy-saving technologies into our manufacturing processes.
- Transition to more energy-efficient equipment and practices.

3. Sustainable Partnerships

- Work with stakeholders who share our vision for environmental responsibility.
- Expand collaborations to incorporate greener supply chain practices.

Conclusion

Hadfield Services Ltd is dedicated to turning aspirations into actions. Our Climate Strategy is a testament

to our commitment to sustainability, innovation, and a greener future. Together with our team, partners,

and customers, we aim to lead by example and set a standard for environmental responsibility in the engineering and manufacturing industry.
